

My name is Nikoletta Koskeri, I am from Greece and I have been living in Reykjavik for over a year now.

I hold a Bachelor's Degree in Psychology, complemented by specialized courses in Health and Stress Management. The vast and captivating realm of science has been a continuous source of inspiration, leading me to discover a fulfilling opportunity in working with children

over the past few years. This role has brought me immense joy and has provided invaluable learning experiences as I contribute to a community that nurtures and empowers children to thrive.

Beyond my passion for child development, I find boundless inspiration in travel, which has become an integral part of my life. I eagerly embrace every opportunity to explore new places, connect with diverse cultures, and immerse myself in the beauty of nature. My love for travel has enriched my understanding of the world and cultivated my appreciation for the richness of human experiences.

I indulge in creative pursuits during my leisure time, crafting unique handmade creations such as jewellery and decorative pieces using macramé techniques. These artistic endeavours allow me to express my imagination and bring beauty into everyday life.

To maintain inner harmony and relaxation, I have embraced the practices of yoga and gardening. They serve as meditative outlets, promoting both physical and mental well-being. Additionally, my fondness for music and documentaries fuels my intellectual curiosity and further enriches my life experiences.

I am excited to embark on this preschool adventure, and I assure you that I will devote my utmost dedication and passion to providing a nurturing and inspiring environment for the children under my care.

Thank you for entrusting me with this responsibility, and I look forward to the opportunity to create a positive and enriching experience for all involved.
